Speed Kit Lesson 4

Speed in Order

Name:_____

Date:_____

So far students have learned about Slow, Fast, Cruise and Turbo Speed Codes. Time to put them in order!

Place the magnets in the following configuration, but leave out the speed codes. Have students add in the speed codes in order from slowest to fastest. After running the bot have students put the Speed Codes in order from fastest to slowest.

Note: add a straight line after the Win/Exit (Play Again) at the end of the line so the bot can complete the action.
